Rice Price - Weekly

2010

Approved By:

Prepared By:

Report Highlights:

Rice price offers from exporters were fairly stable last week in the face of low export demand. Minor price reductions for 15 percent broken and 25 percent broken rice quotations were reported, because exporters wanted to attract buyers of specifically these kinds of rice.

Paddy prices were unchanged last week. Post believes that paddy prices will rise slowly, since the Mekong River Delta rice harvest has ended.
